

Best Site media sharing web application - UI documentation

Main characteristics of the page

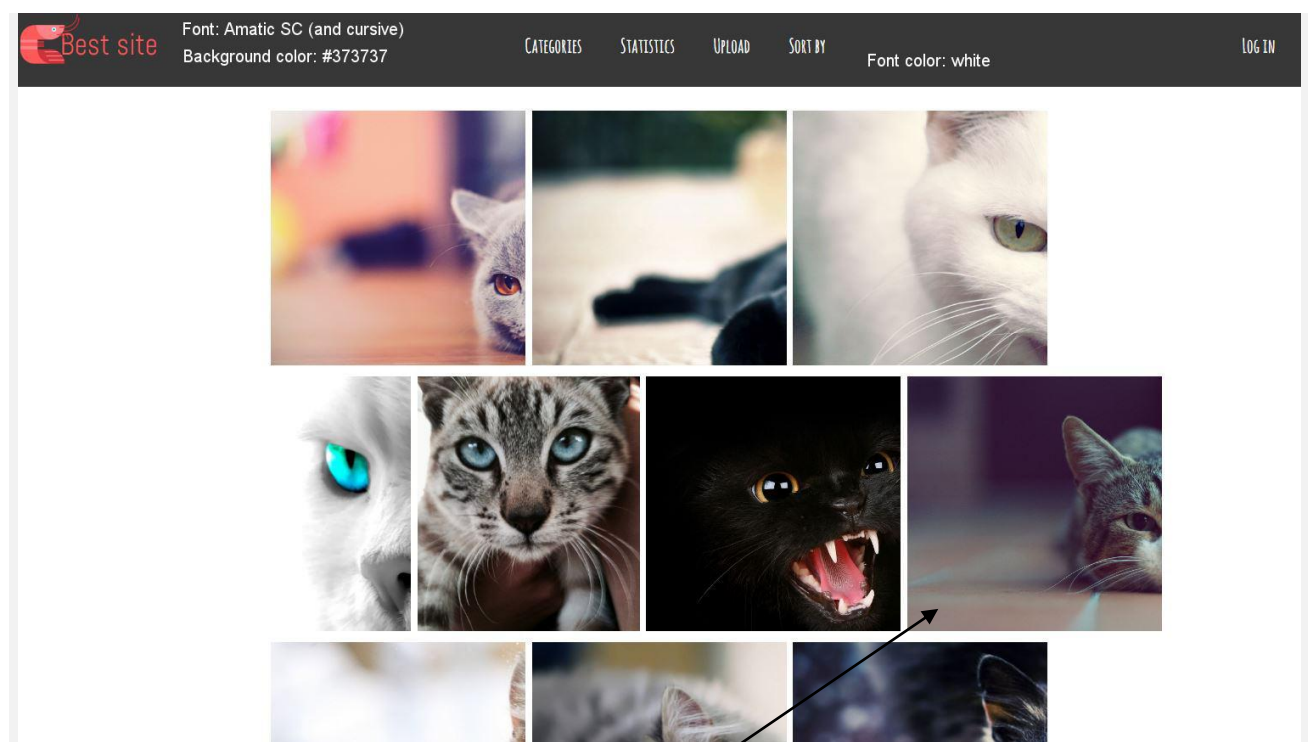

Best Site web page has four main colors: white and three shades of grey.

The header of the page is fixed into its position on top of the screen. When a user scrolls down the page, header stays visible the whole time. This makes the usage of the page faster and easier, especially with mobile devices.

Header includes 'Categories' where the user can find tags and scroll through pictures tagged in different ways. An example of usage is shown later on.

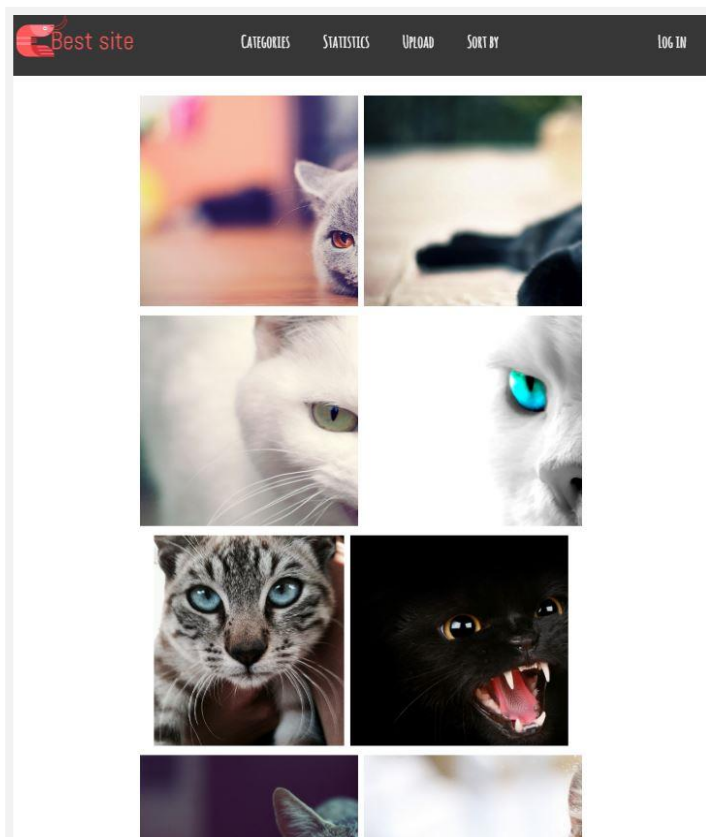

Next items in the header are 'Statistics', where the vote statistics are (design and implementation in progress), 'Upload' for uploading pictures to the page, 'Sort by' with different options for sorting the content and 'Log in' which includes also signing up.

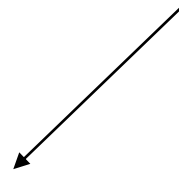

Picture 1. Desktop view of the main page.

When hovering over a picture, the picture gets 70% transparent and a heart is shown in the top right of the photo. Also the number of votes is planned to be shown here.

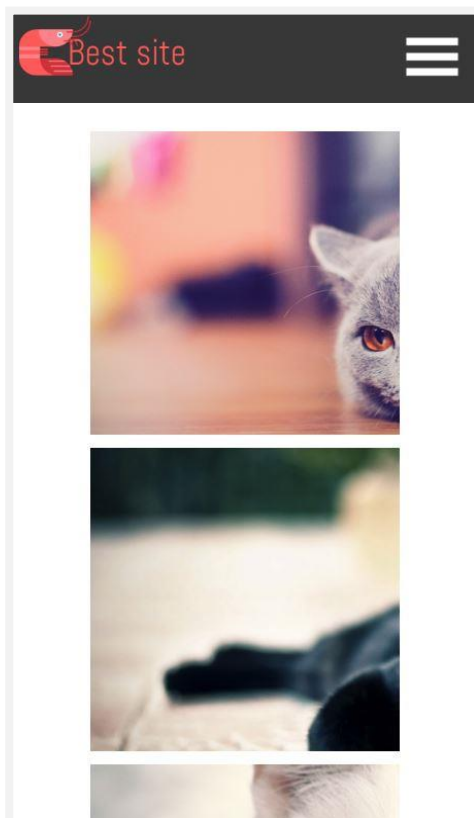

The pictures can be opened for a larger view by clicking.

The gallery view is responsive; it rearranges its content when the screen is smaller.

Picture 2. Mobile view - high resolution.

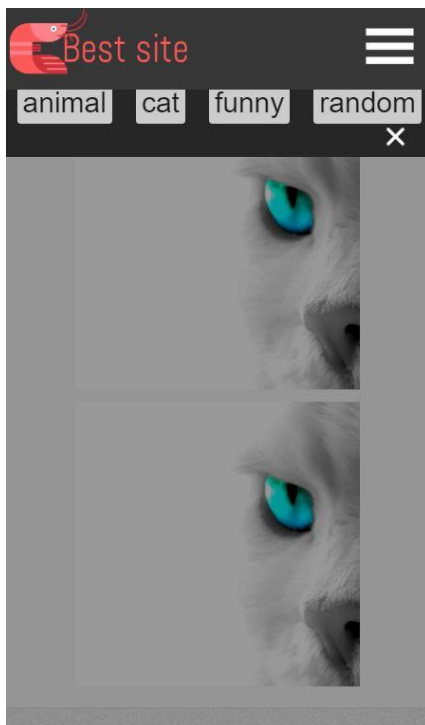

Header content turns into a hamburger menu, when the screen is less than 620px wide.

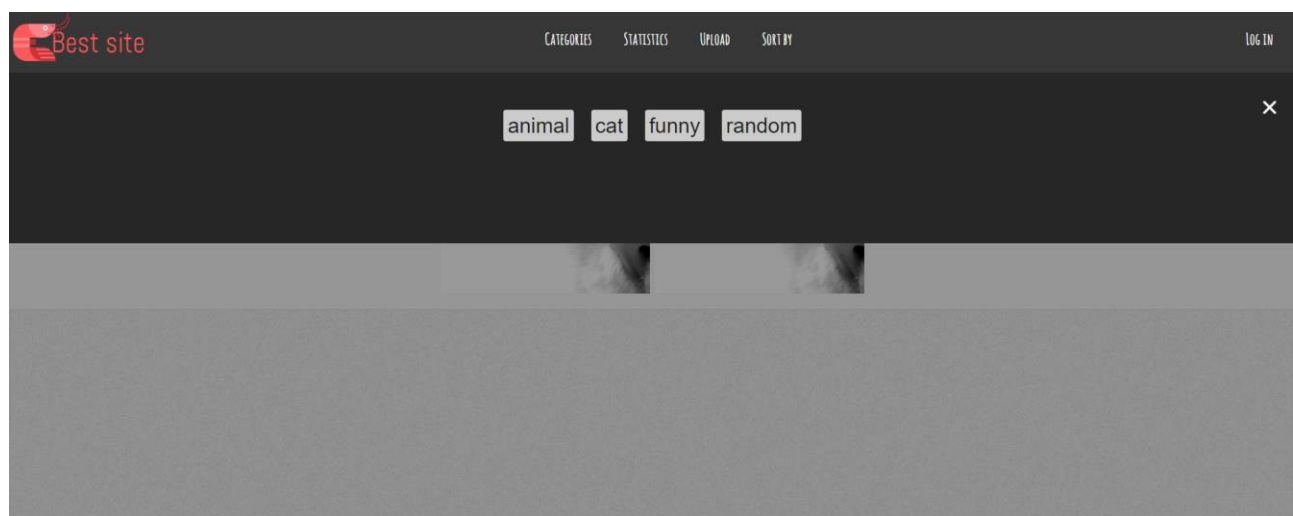

Picture 3. Mobile view - small resolution.

The Categories

With categories,
user can scroll through different kind of pictures.

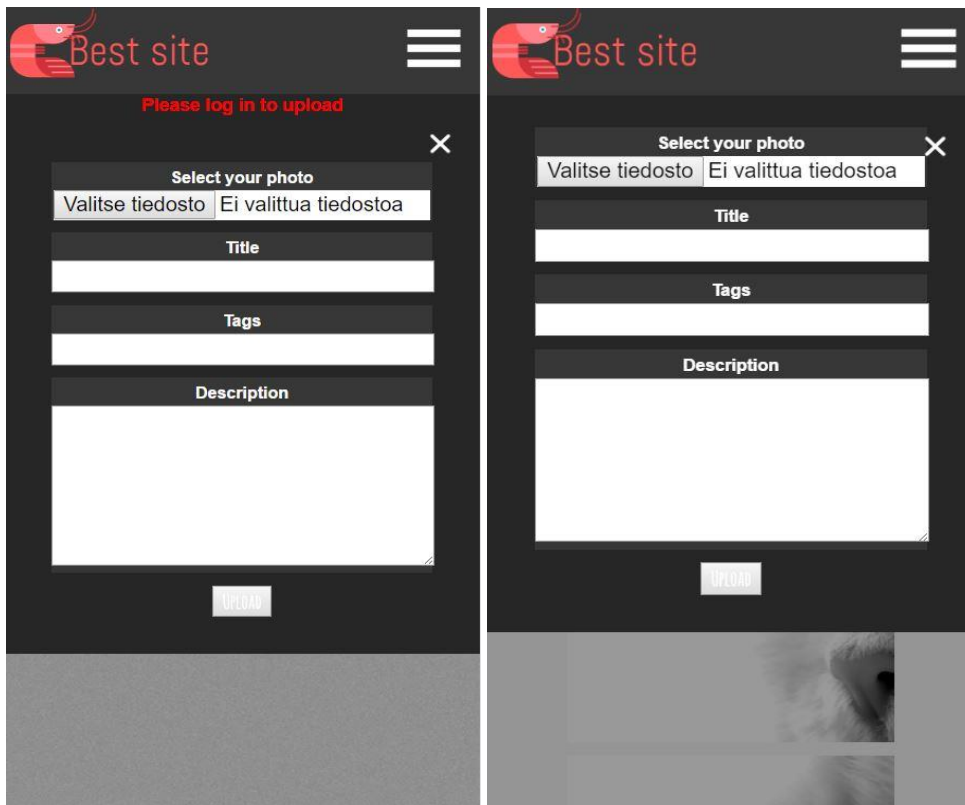

Picture 4. Categories mobile view.

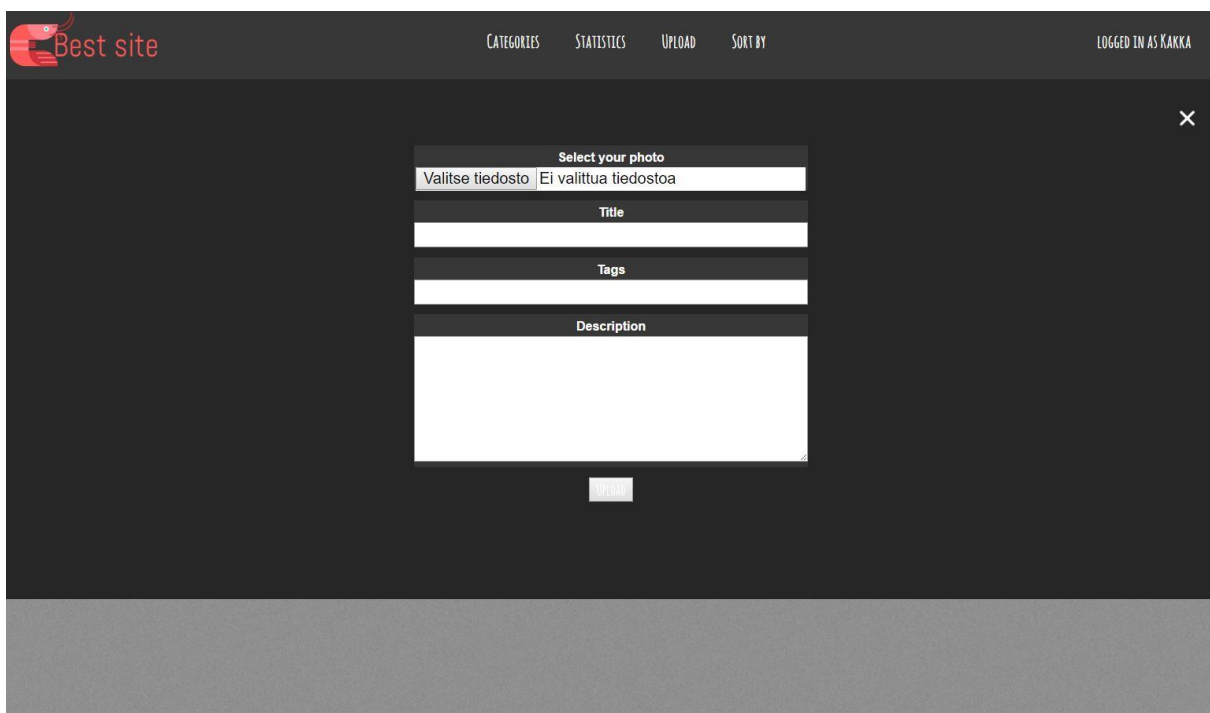

Picture 5. Categories desktop view.

Upload

By clicking the upload, the form for uploading opens, but the user can't upload anything without logging in. There is an alert shown (see picture 6).

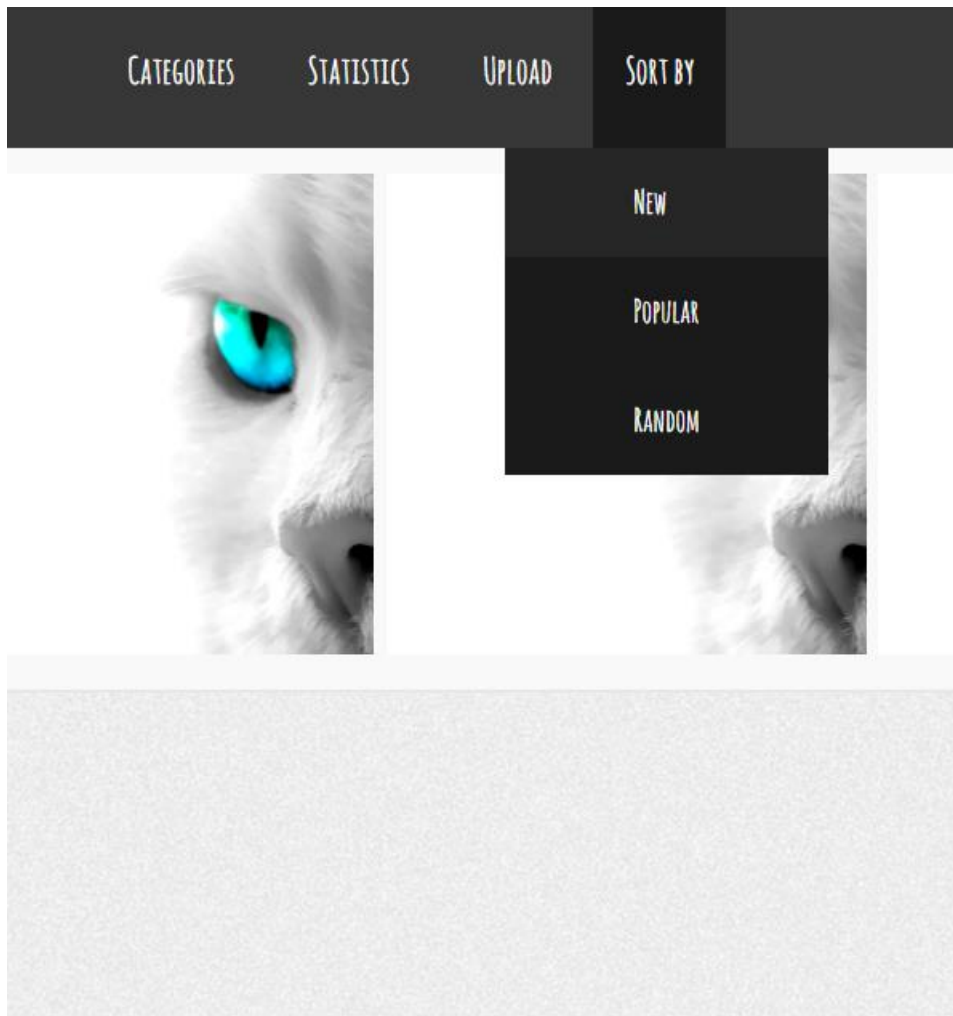

Pictures 6 and 7. Photo upload with and without logging in in mobile.

Picture 8. Upload view on desktop as a logged in user.

Sort by

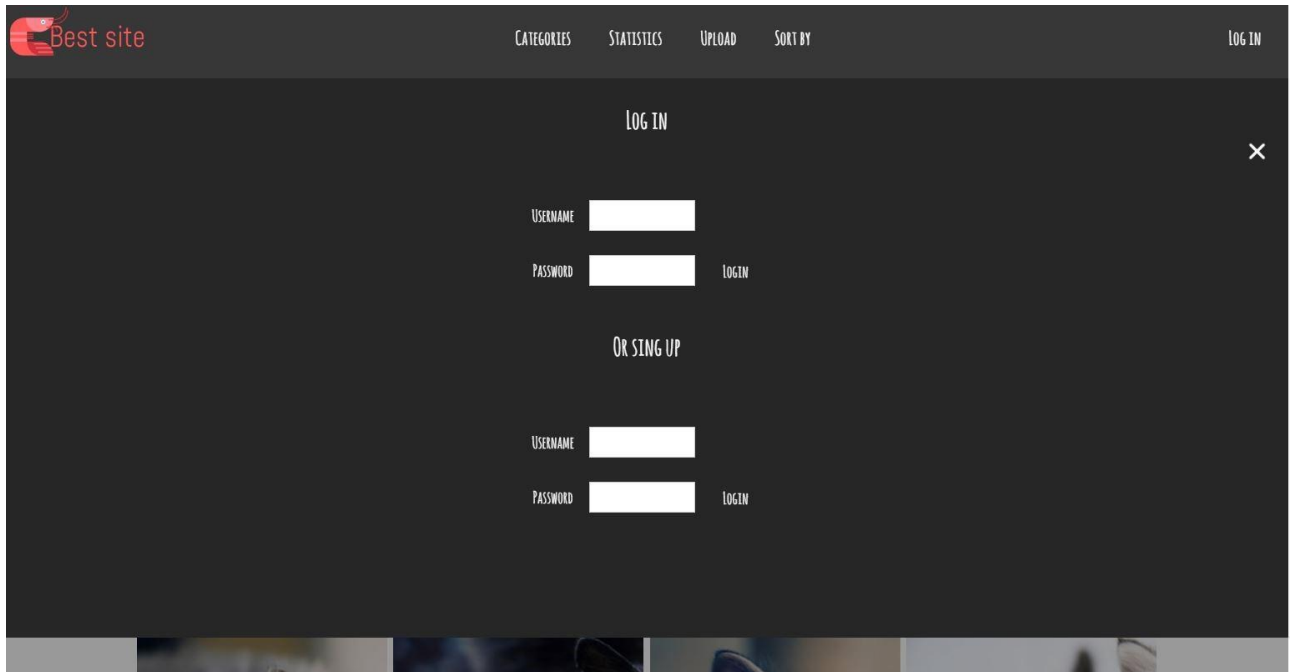

Hovering over the 'Sort by' in header opens a dropdown menu with the options of how to organize the pictures. The current options are: 'new' (works), 'popular' and 'random'.

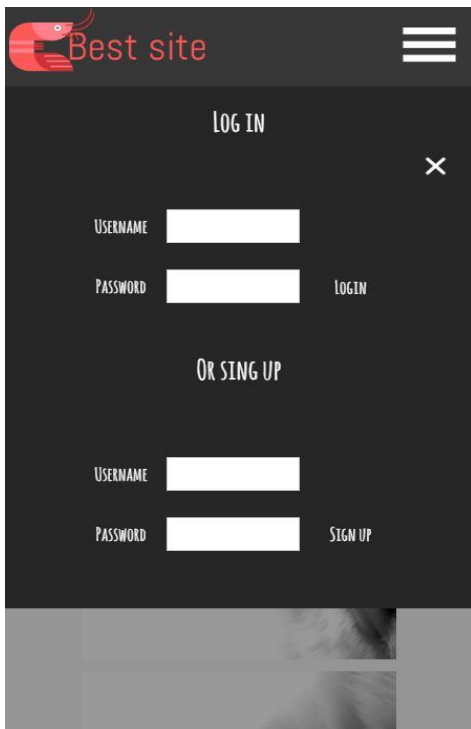

Picture 9. Sort by dropdown menu's content in desktop view.

Logging in and/or signing up

To be able to comment, vote or upload a picture or picture, one must be signed up and logged in as a user of the page. Log in and sign up can be found on the top right in desktop view (picture 9) and in the hamburger menu on mobile view (picture 10).

Picture 9. Log in and sign up are in the same view.

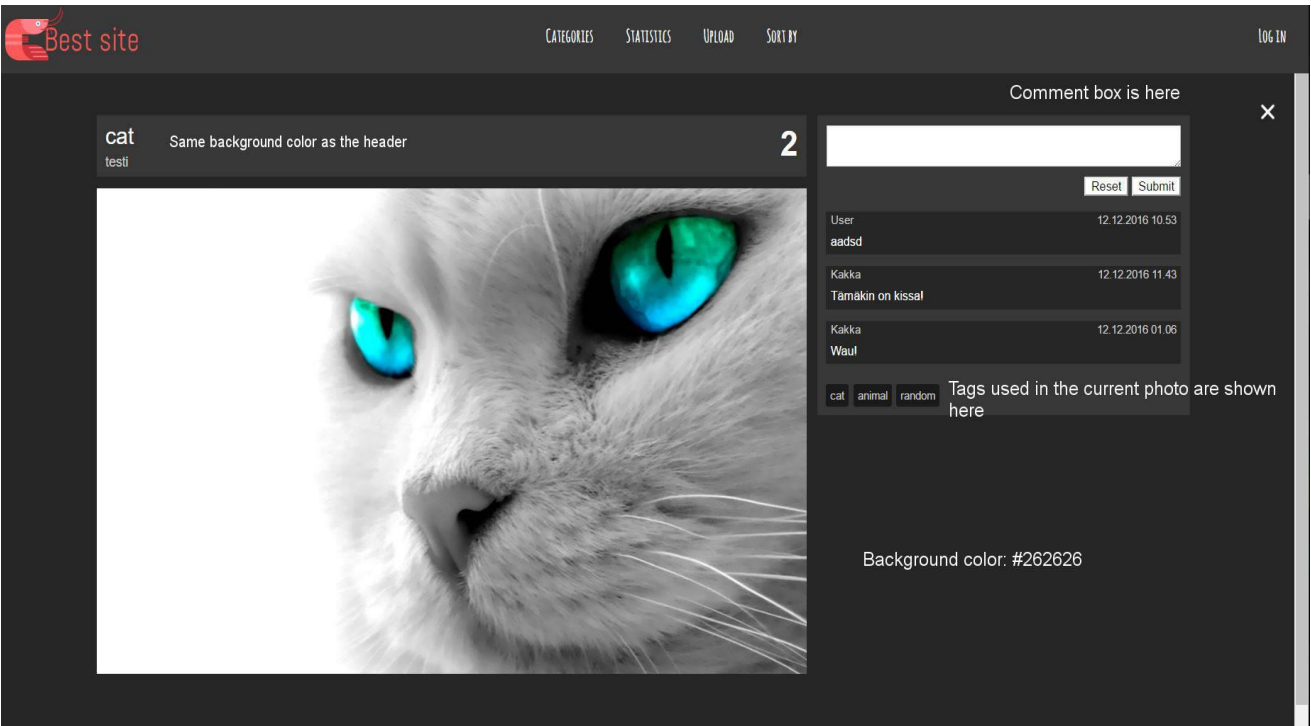

The log in view can be closed here.

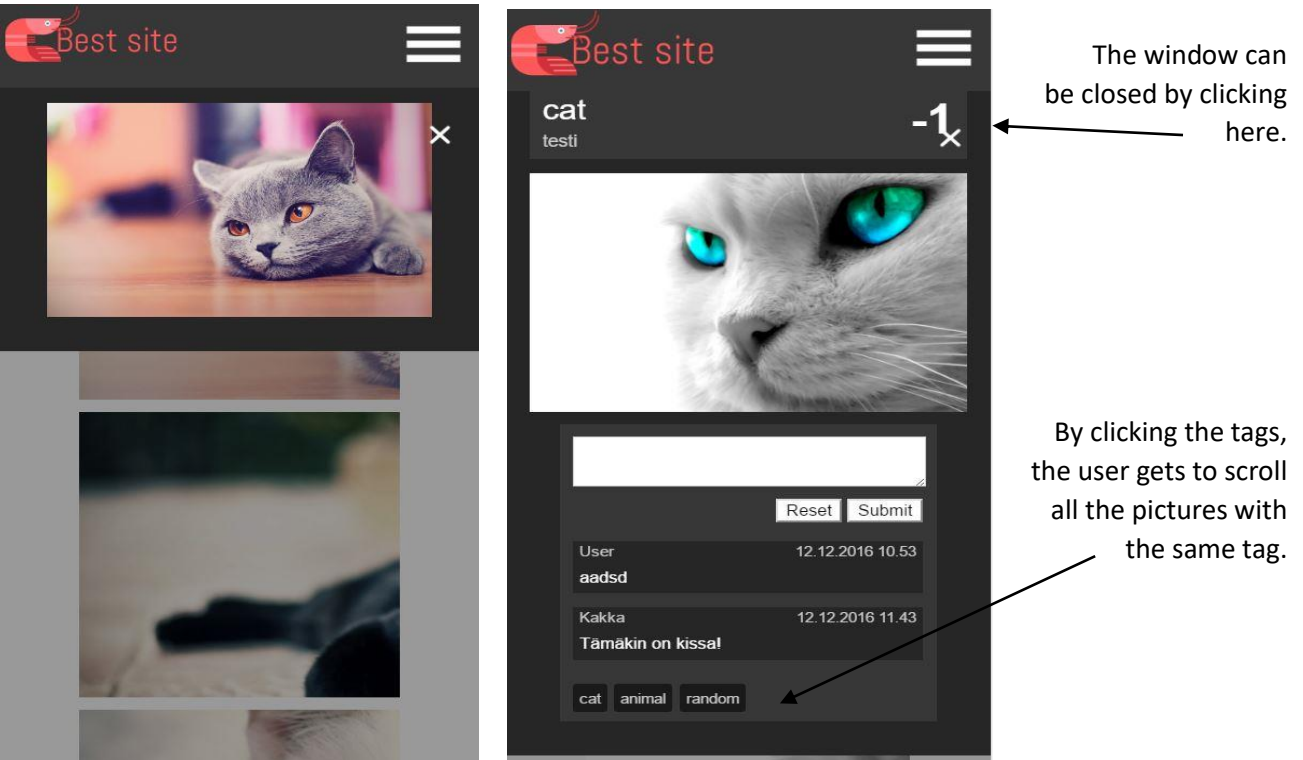

Picture 10. Log in and sign up in mobile.

The Photo View

The photoview is opened by clicking a picture.

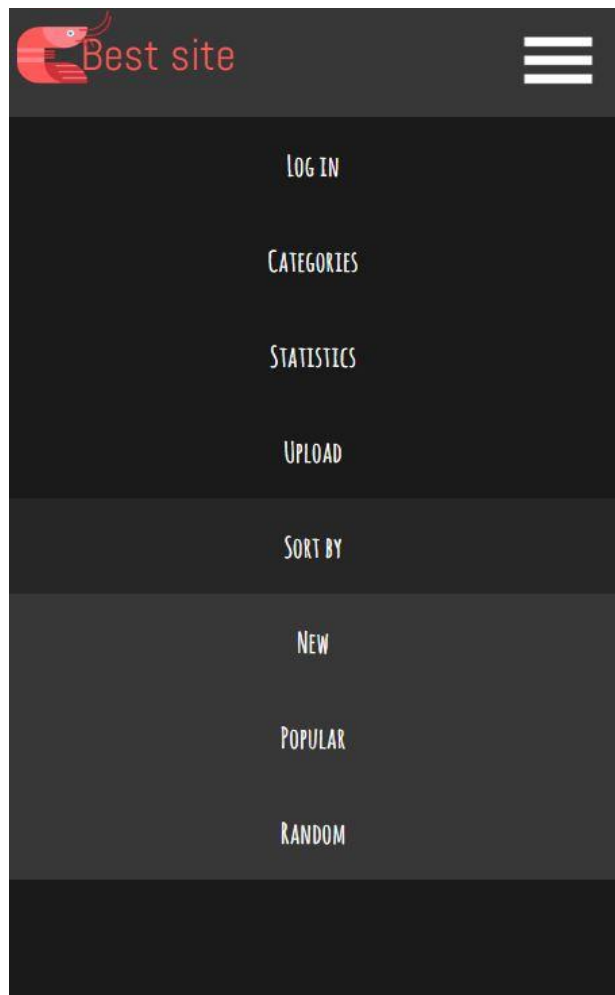

Picture 4. Desktop view of an opened picture with details, tags, votes and comments.

Picture 5 and 6. Mobile view of an opened picture with and without comments and extras.

The hamburger menu in mobile

When the screen is too narrow to display the content of the header, the content is moved into a dropdown menu. The menu can be opened by clicking the three lines on the top right of the screen. The last option in the menu, 'sort by', opens a new menu with its own content: the options of how the pictures can be organized (see picture 8).

Pictures 7 and 8. The Hamburger menu's content in mobile view with low resolution.
